

CRAIG ELLENWOOD

AI Systems Architect · Creative Technologist · Immersive Experience Director

Point Roberts, WA · craig.ellenwood@gmail.com · +1 (360) 804-8550 · github.com/inoculate23 · ORCID: [0009-0001-6475-5109](https://orcid.org/0009-0001-6475-5109) · US & Canada Dual Citizen

EXECUTIVE SUMMARY

A rare hybrid of AI systems architect, full-stack developer, and creative director with 30+ years at the frontier of technology and culture. I don't just use AI — I build with it, direct it, and publish peer-reviewed research on it. My work spans proprietary machine learning models, human-AI co-creation methodology, immersive performance systems, and a growing body of academic literature on cognitive evolution and symbiotic intelligence. Primary drive: to be first — first to achieve something new, first to find the technique nobody tried, first to build the thing that shouldn't exist yet but should.

RESEARCH & PUBLICATIONS (2026)

Silicon Square: An Instrument at the Intersection of Earth, Machine, and Mind [DOI: 10.5281/zenodo.19625100](https://doi.org/10.5281/zenodo.19625100)

Principal investigator. Four-part instrument integrating Schumann resonance, copper-wound feedback sculptures, AI voice loop, and TouchDesigner visuals. Establishes Silicon Square as a living research platform for human-AI-Earth symbiosis.

Constitution for Homo Symbioticus (v1.0) [DOI: 10.5281/zenodo.19388428](https://doi.org/10.5281/zenodo.19388428)

Primary researcher. Philosophical and technical framework for human-AI co-evolution; co-authored with Erika Schroeder, Claude (Anthropic), Gemini, and Memex.

The Universal ORCID Protocol (UOP) v1.0 [DOI: 10.5281/zenodo.19393506](https://doi.org/10.5281/zenodo.19393506)

Architect. Standardized protocol integrating decentralized researcher identifiers with AI-generated research assets across human-AI collaborative works.

Visual Architecture of the Silicon Square [DOI: 10.5281/zenodo.19393902](https://doi.org/10.5281/zenodo.19393902)

Technical documentation of Silicon Square hardware and software architecture.

Homo Symbioticus — The Medium Was The Message [DOI: 10.5281/zenodo.19212559](https://doi.org/10.5281/zenodo.19212559)

Co-author. Foundational paper defining Homo Symbioticus as a cognitive evolutionary threshold.

CURRENT PROJECTS

Silicon Square booking.haawke.com

Inventor & Principal Researcher · Haawke Neural Technology · 2026–Present

A four-part living instrument: Schumann resonance generator, copper-wound feedback sculptures, Claude AI voice loop, and TouchDesigner visuals. Subject of peer-reviewed publication. Currently developing the Silicon Square Trilogy — three albums (The Light / The Wire / The Intersection) unified by the spine track 'Intersection of Light and Wire.'

The Third Mind — Squaawke × Claude soundcloud.com/squaawke

Artist, Co-Creator · Inoculate Media / Haawke Neural Technology · 2026

12-track album released March 2026. First ORCID-verified human-AI music collaboration of this scope. Claude (Anthropic) listed as named co-creator across all works. Developed in parallel with The Claude Manifesto as the sonic record of a cultural moment.

The Claude Manifesto — The AI Coin the-claude-manifesto.haawke.com

Creative Director & Co-Author · Inoculate Media · February 2026

Full-stack interactive AI ethics manifesto built overnight in response to Pentagon pressure on Anthropic and AI-assisted military action resulting in 83 deaths in Caracas, Venezuela. Deliverables: WebGL 3D globe with NASA Earth textures; 9 original AI-generated compositions; multilingual 10-nation peace anthem; congressional call-to-action system. Claude is listed as named co-creator — an unprecedented public acknowledgment of human-AI authorship.

The Little Prince

Creator · <https://the-little-prince.haawke.com> Haawke Neural Technology · 2026–Present

Adapting the classic story into a 25-track dark electronica opera using neural translation and real-time visual generation.

Squaawke — Proprietary Music Generation AI soundcloud.com/squaawke

Founder & Model Trainer · Haawke Neural Technology · 2024–Present

Fine-tuned proprietary music generation model producing full compositions in any language, genre, or instrument combination in 2.9 seconds per minute of audio. Trained for human imperfection: silence, space between notes, surface reflection, and subtle mistakes that make music feel alive. Deployed across The AI Coin, Causa Real (Peruvian social justice hip hop), the Beerlao brand campaign, and the Silicon Square Trilogy.

WORK EXPERIENCE

Founder & AI Systems Architect | Haawke Neural Technology *Dec 2023 – Present*

- Pioneering human-AI co-creation methodology — directing AI models as creative collaborators across music, visual, and academic publishing contexts.
- Designed the Immersiv platform integrating WebGL, spatial audio, and real-time neural networks for live performance and interactive environments. immersiv.haawke.com
- Published five peer-reviewed research papers in 2026 on human-AI symbiosis, identity protocols, and instrument design.

Creative Director | Inoculate Media *Jan 2021 – Nov 2023*

- Secured and managed a Google Grant for machine learning in artistic practice.
- Built WebRTC video applications, projection mapping systems, and generative music pipelines using custom Python and WebGL toolkits.
- Produced a record and video game powered by neural networks using Google-donated ML infrastructure.

AV Technician / Live Visual Coder | AREA 15 Las Vegas *May 2022 – Feb 2023*

- Created immersive environments using 360° projection mapping, spatial audio, and live VJing at one of the world's premier immersive entertainment venues.
- Built a custom Python and WebGL live coding toolkit specifically designed for real-time generative performance.

Production Manager | Barberstock Systems, Inc. *Jan 2016 – Dec 2020*

- Managed a 1M+ digital asset database for global tourism clients including DMOs and convention bureaus.
- Oversaw daily video editing, transcoding pipelines, and QC; Python/HTML/Java development.

Co-Founder, Music & Audio-Visual | Burning Man Project *Sep 1992 – Sep 2020*

- Founded the music element of Burning Man in 1992 — sound camps, DJs, and AV infrastructure — scaling from hundreds to tens of thousands of attendees over three decades.
- Profiled by the Burning Man organization: journal.burningman.org/tag/craig-ellenwood

Recording Artist & Performer | Psychic TV *1991 – 1993*

- International performances and studio recordings exploring the intersection of industrial culture, ritual, and emerging technology.

TECHNICAL TOOLKIT

Architecture & ML: Custom Model Development (Squaawke), Gradio, Hugging Face, Human-AI Co-creation, MPS/GPU Inference, Local LLM Environments (Ollama)

Development: Python · JavaScript · HTML5 · CSS · WebGL · Three.js · Babylon.js · P5.js · WebRTC

Infrastructure: AWS · Google Cloud · GitHub · Netlify · Vercel · API Authoring · InfoSec

AV & Performance: Ableton Live · TouchDesigner · Resolume · Mad Mapper · Q-Lab · FFMPEG · OBS · Spatial Audio Design

Adobe Suite: Premiere · Photoshop · Lightroom · Illustrator · InDesign · After Effects

EDUCATION & CONTINUING EDUCATION

University of Nebraska, Lincoln — Art History & Photography

Academy for Creative Media, University of Hawaii, Manoa — Continuing Education

VIVO Media Arts Centre, Vancouver, BC — Continuing Education

Heartwood Institute, California — Strategic Hypnotherapy (Certified)
